

BeGenius

THE FLEXIBLE SOLUTION TO MANAGE COMPLEX MDx TESTING NEEDS

FULL & FLEXIBLE AUTOMATION

Multiple operational modes: extraction, amplification and result analysis performed together or separately

FLEXIBLE SAMPLE PROCESSING

Universal extraction allows to run different sample matrices at once; extracted sample can be stored for further analysis

FULL FLEXIBILITY IN PCR TESTING

Run any type of PCR simultaneously thanks to 24 independent thermal cyclers and optical readers

FLEXIBLE MENU

Mix and match of CE-IVD, laboratory developed, or Research use only tests, provided by ELITechGroup or Third Party Companies

ELEVATE YOUR MOLECULAR WORKFLOW

1 Bi-directional LIS facilitates patient management

3 Cooling unit for samples, eluates, and reagents to improve on-board stability

5 Qualitative & Quantitative nucleic acid amplification and melting curve analysis

2 Full Traceability thanks to integrated barcode scanner for sample, eluates, and reagents

4 Mix and Match different assays on the same run: 24 validated biological matrices
